Messages

The NYSEG price for providing electricity supply during this billing period was \$0.09059322/kwh which includes a Merchant Function Charge of \$0.0036/kwh. If you decide to shop for electricity supply, you can compare this information with prices offered by energy services companies (ESCOs). You could achieve some tax savings if you switch to an ESCO. Additionally, if the ESCO includes its charges on your NYSEG bill, you would not have to pay NYSEG's bill issuance charge. If you buy electricity from an ESCO, NYSEG will continue to deliver the electricity to you and you will continue to pay NYSEG for delivery, transition and basic service charges.

We're making energy assistance easier to access. More households now qualify for monthly bill credits through our Enhanced Energy Affordability Program (EEAP). Get details about EEAP and more at nyseg.com/HelpWithBill.

Whether you're a contractor or homeowner, safe digging starts with UDig NY. This easy, free, statewide service identifies any underground utilities and protects you and others from injury. Visit UDigNY.org between two and 10 working days before you start to dig.

We have resources to help you understand and manage your energy bill. If you purchase your energy supply from us, we pass through that cost to you without profit. Visit nyseg.com/UnderstandYourUsage for more information that can help you manage your monthly energy bills.

Through the Powering New York program, we're planning to upgrade transmission lines to make your power more reliable and ready for the future. These improvements will help keep the lights on, strengthen the network and support New York's clean energy goals. We're investing in these upgrades for you, our valued customers and communities.

Page 4 of 4

Total Adjustments**\$-1,151.52****Terms and Definitions**

Delivery charge: what you pay NYSEG to transport energy to your home or business.

Supply charge: what you pay for the energy purchased for you by NYSEG or a supplier other than NYSEG.

Payment & billing services charge: the cost to produce and send you (electronically or paper) a bill and process payments. Customers who use an energy supplier (also known as an energy services company or ESCO) other than NYSEG will not be assessed this charge by NYSEG if their ESCO's supply charges appear on their NYSEG bill, however, their energy supplier may charge a similar fee.

Payment & billing service GRT: Gross Receipts Tax collected by New York State and/or local municipalities. Rate varies depending on your town, village or city.

Basic service charge: includes a portion of the cost of the meter, meter reading, billing and part of the cost for delivery service. Appears on your bill whether or not you use any electricity or natural gas during the billing period.

Kilowatt-hours (kwh): measure of electricity use.

ccf (hundreds of cubic feet): measure of volume of natural gas used. You are charged based on therms, the energy (heat) content of natural gas.

Merchant function charge: reflects the administrative costs of obtaining electricity and natural gas supply. Customers with a supplier other than NYSEG are not charged by NYSEG for this service.

System Benefits Charge (SBC): a state mandated charge for all electric and natural gas customers. The SBC is used to fund clean energy activities conducted by NYSERDA.

Revenue decoupling mechanism: a charge or credit on your bill that reflects the difference between forecast and actual delivery service revenues by service classification to encourage the promotion of energy efficiency and renewable technologies.

Recovery Charge: Is a charge approved in a financing order issued to NYSEG by the New York State Public Service Commission. NYSEG Storm Funding, LLC is the owner of the rights to the Recovery Charge. NYSEG is acting as a collection agent or servicer for NYSEG Storm Funding, LLC.

Weather adjustment: moderates natural gas bills during any extreme weather between October 1 and May 31. If temperatures during the billing period are colder than normal, customers typically receive a credit; if temperatures are warmer than normal, customers receive a charge.

Meter Mult (Meter Multiplier): when the actual amount of energy you use is more than can be registered on the meter, the meter displays a fraction of your actual use. A multiplier is then applied to determine your actual energy use. When a multiplier is used, it will be shown in the "Meter Mult" box under the "NYSEG Detailed Account Activity" section of your bill.

Transition charge/surcharge: reflects the costs of making the electricity and/or natural gas industry more competitive; includes associated credits and/or charges. For electricity, this charge also collects the cost for programs such as: Value of Distributed Energy Resources (VDER) Value Stack Credits, Distribution Load Relief Programs, Rate Adjustment Mechanism (RAM), Non-Wire Alternatives (NWA), Earnings Adjustment Mechanism (EAM), Electric Vehicle (EV) Make Ready Surcharge and Energy Storage Deployment Cost Recovery. For gas, this surcharge also collects costs for the Rate Adjustment Mechanism (RAM), Earnings Adjustment Mechanism (EAM), and Non-Pipe Alternative (NPA).

Prorated bills: calculated by determining your average daily energy cost and multiplying it by the number of days in your billing period. Prorated bills are used only when your billing period is shorter or longer than usual.

Pay your bill by mail, at nyseg.com, by downloading our Mobile App, using our automated phone system at 800.600.2275 or at any of NYSEG's authorized pay agents. If you pay in person, please bring your entire bill.

Payment is due when you receive your bill. Your payment must be postmarked by the "Late Fee After" date shown on page 1. If paying in person, payment must be made by the "Late Fee After" date. Payments received after the "Late Fee After" date will be subject to a 1.5% late payment charge per month.
